

Hitachi Apron

Description

The EUB-7000 HV is a reliable, compact, all-round platform that delivers high-quality images and a wealth of diagnostic information. It is designed for a wide range of clinical areas, including obstetrics, gynecology, radiology, endoscopic ultrasound (EUS), urology, surgery, cardiology, vascular medicine, endocrinology, rheumatology and many other surgical and non-surgical applications.

This model is equipped with unique functions such as HI Zoom. HI Zoom performs local high-quality image zoom. Aeronavigation in the M-regime decreases the time of investigation significantly. The size of EUB-7000HV is smaller than the size of another model. This scanner may be equipped with a Sonoelastography function, which performs more advanced investigations.

Condition: Refurbished

Color Doppler with Convex + Linear Probes

Printer: Yes
